

FRANOMA 

Lightweight, Durable, Natural by Design

COLLECTION 2021

FRANOMA CO., LTD

THE BEAUTY OF CRAFTMANSHIP

Each product of FRANOMA is created with passion and love from our skillful workers. We pay attention to the finest detail to ensure the quality and safety for the end users. Every step in the complex production process is performed with a high attention, then carefully checked by our experienced engineers and QC.

THE PRODUCTS OF CARING

We are concerned about the products, the users, and especially the environment in the entire production process. Since the nature inspires us, we care for the nature in return. The specified minerals and materials are at the top of quality and simultaneously the least in causing harm to the environment as well as our workers.

FRANOMA'S COMMITMENT

UP TO 70% Lighter
than natural stone
materials

10 years frost
proof guarantee

NO sharp edges,
excess resin spots

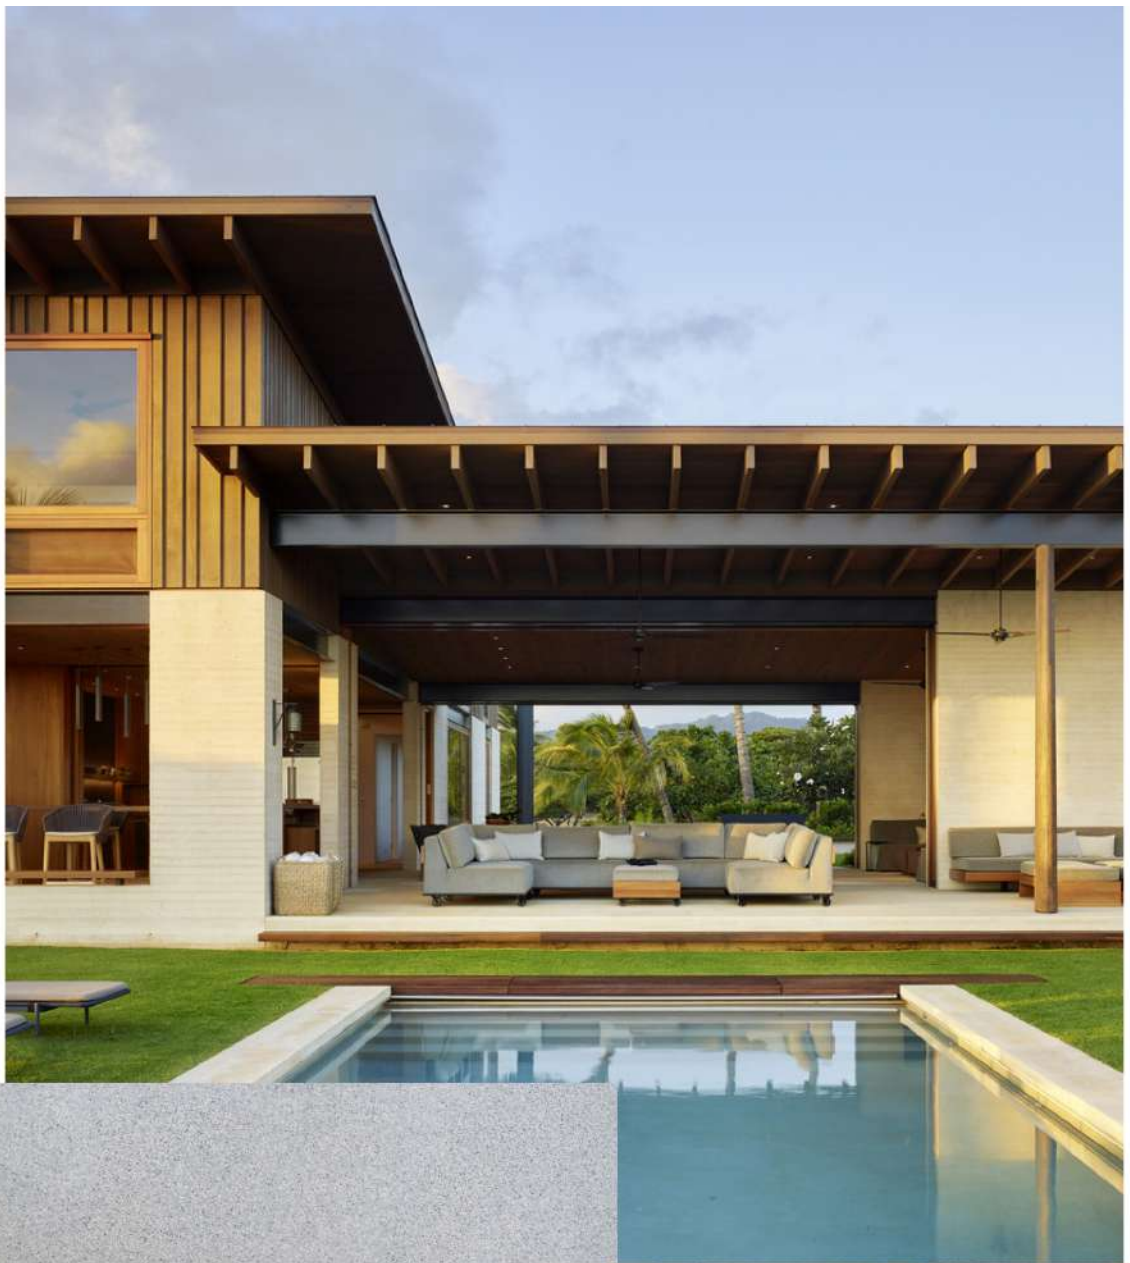

ETHICAL value: care
for the workers' health
and working conditions

100% Pass:
UV and weather test,
strength test

FRANOMA only sources premium quality materials for its fine products, which are then handcrafted by a skilled workforce. Providing products of the highest quality is our promise to our clients.

NatureLine

The look and feel of NatureLine was designed to showcase the fine mineral stone powder. This powder captures the natural character of the stone including its colors and textures, whilst also expressing the natural look of the minerals. The manufacturing process involves a specialist lamination technique which applies both the stone powder and resin to the fiberglass.

Each layer of these materials is skillfully applied by hand until the required thickness and appearance is achieved. Finally, a clear topcoat of premium two-component paint is applied to protect the product from all weather conditions.

SandStone

SandstoneLine is a heritage style line with a unique weathered feel and an antique coloring. This distinctive finishing is made of layers of natural grey, white and brown sand, which when mixed create an attractive natural and vintage style appearance. This sand composite look is fixed together by the resin applied after the fiberglass layers. Once again, we complete the process with a layer of clear premium two-component paint to ensure weatherproof protection.

FRANOMA 

Lightweight, Durable, Natural by Design

COLLECTION 2021
FRANOMA CO., LTD

THE BEAUTY OF CRAFTSMANSHIP

Each product of FRANOMA is created with passion and love from our skillful workers. We pay attention to the finest detail to ensure the quality and safety for the end users. Every step in the complex production process is performed with a high attention, then carefully checked by our experienced engineers and QC.

THE PRODUCTS OF CARING

We are concerned about the products, the users, and especially the environment in the entire production process. Since the nature inspires us, we care for the nature in return. The specified minerals and materials are at the top of quality and simultaneously the least in causing harm to the environment as well as our workers.

FRANOMA'S COMMITMENT

UP TO 70% Lighter
than natural stone
materials

10 years frost
proof guarantee

NO sharp edges,
excess resin spots

ETHICAL value: care
for the workers' health
and working conditions

100% Pass:
UV and weather test,
strength test

FRANOMA only sources premium quality materials for its fine products, which are then handcrafted by a skilled workforce. Providing products of the highest quality is our promise to our clients.

NatureLine

The look and feel of NatureLine was designed to showcase the fine mineral stone powder. This powder captures the natural character of the stone including its colors and textures, whilst also expressing the natural look of the minerals. The manufacturing process involves a specialist lamination technique which applies both the stone powder and resin to the fiberglass.

Each layer of these materials is skillfully applied by hand until the required thickness and appearance is achieved. Finally, a clear topcoat of premium two-component paint is applied to protect the product from all weather conditions.

PatinaLine

PatinaLine encapsulates natural elements in a composite product. The color is the mixture of the resin color pigmentation and sand. The natural textures are handcrafted on a master template which are embedded into the molds during production.

Fiberglass enhances the structural strength of the product following the sand and resin paint process. To create the Patina effect, we use a special in-house paint before sealing the product with our clear premium two-component paint to protect from all weather conditions.

SandStone

SandstoneLine is a heritage style line with a unique weathered feel and an antique coloring. This distinctive finishing is made of layers of natural grey, white and brown sand, which when mixed create an attractive natural and vintage style appearance. This sand composite look is fixed together by the resin applied after the fiberglass layers. Once again, we complete the process with a layer of clear premium two-component paint to ensure weatherproof protection.
